

# Thermo-Light

## INSULATED FLOATING BLANKET

The Thermo-light Insulated Floating Blanket can be used with existing manual or automatic retractable security covers to provide additional insulation and help retain heat and moisture.

Our Thermo-Light blanket uses a marine grade vinyl covering over a specially formulated foam core that is slim but efficient, and will not absorb water or moisture.

Each blanket is custom made to fit your pool, is light-weight, and easy to fold and remove. The overlapping velcro hinges allow the cover to come apart or fold into sections.

### FEATURES:

- High insulating factor - R8 rated
- Light weight
- Floats on surface
- Custom fit to your pool
- Easy to install and remove

### FOR USE WITH:

- Endless Pools® Original, Performance, and Elite models

### NOTE:

Thermo-light blankets are not A.S.T.M certified and should be used for insulation purposes only. They will not support weight and are not intended as security covers.
