Notes:

- * Indicates the number of test results that were above the allowable limit for the parameter in question
- Irish Water is required to provide drinking water that meets the standards set out in the Drinking Water Regulations 2014 (SI 122 of 2014)
- For data protection reasons we do not provide specific sample addresses
- Where necessary, exceedances are reported to the HSE to seek their advice in relation to the protection of public health. Arising from this consultation, if any exceedances are deemed a risk, the public are immediately notified.
- Please refer to www.water.ie for a list of all current Boil Water Notices and/or Water Restrictions
- Lead - The quantity of lead in drinking water is dependent on localised factors, i.e. it is property dependent - our treated water does not contain Lead.
- Turbidity - A guideline limit of 4NTU is recommended where Turbidity is measured on the network.
- A sample result with "NT" has not been tested. A parameter may or may not be tested depending on the sample type. Therefore the Compliant field will read "N/A" (Not applicable)
